# Principal's Address

**Wishing you all a Happy and Prosperous 2025!**

As we step into this new year, we reflect on the memorable moments that made the past months special.

December was filled with celebrations, achievements, and learning experiences. The Annual Days for Grades 1 and 2 were a vibrant display of talent and enthusiasm, while the Graduation Day for Grade 12 was a proud milestone, marking the beginning of a new journey for our senior students.

Adding to the excitement, our Grade 9 and 10 students embarked on an enriching trip to Coorg, where they explored nature and bonded over shared experiences. The year ended on a joyful note with Christmas celebrations, spreading warmth and festive cheer across the school.

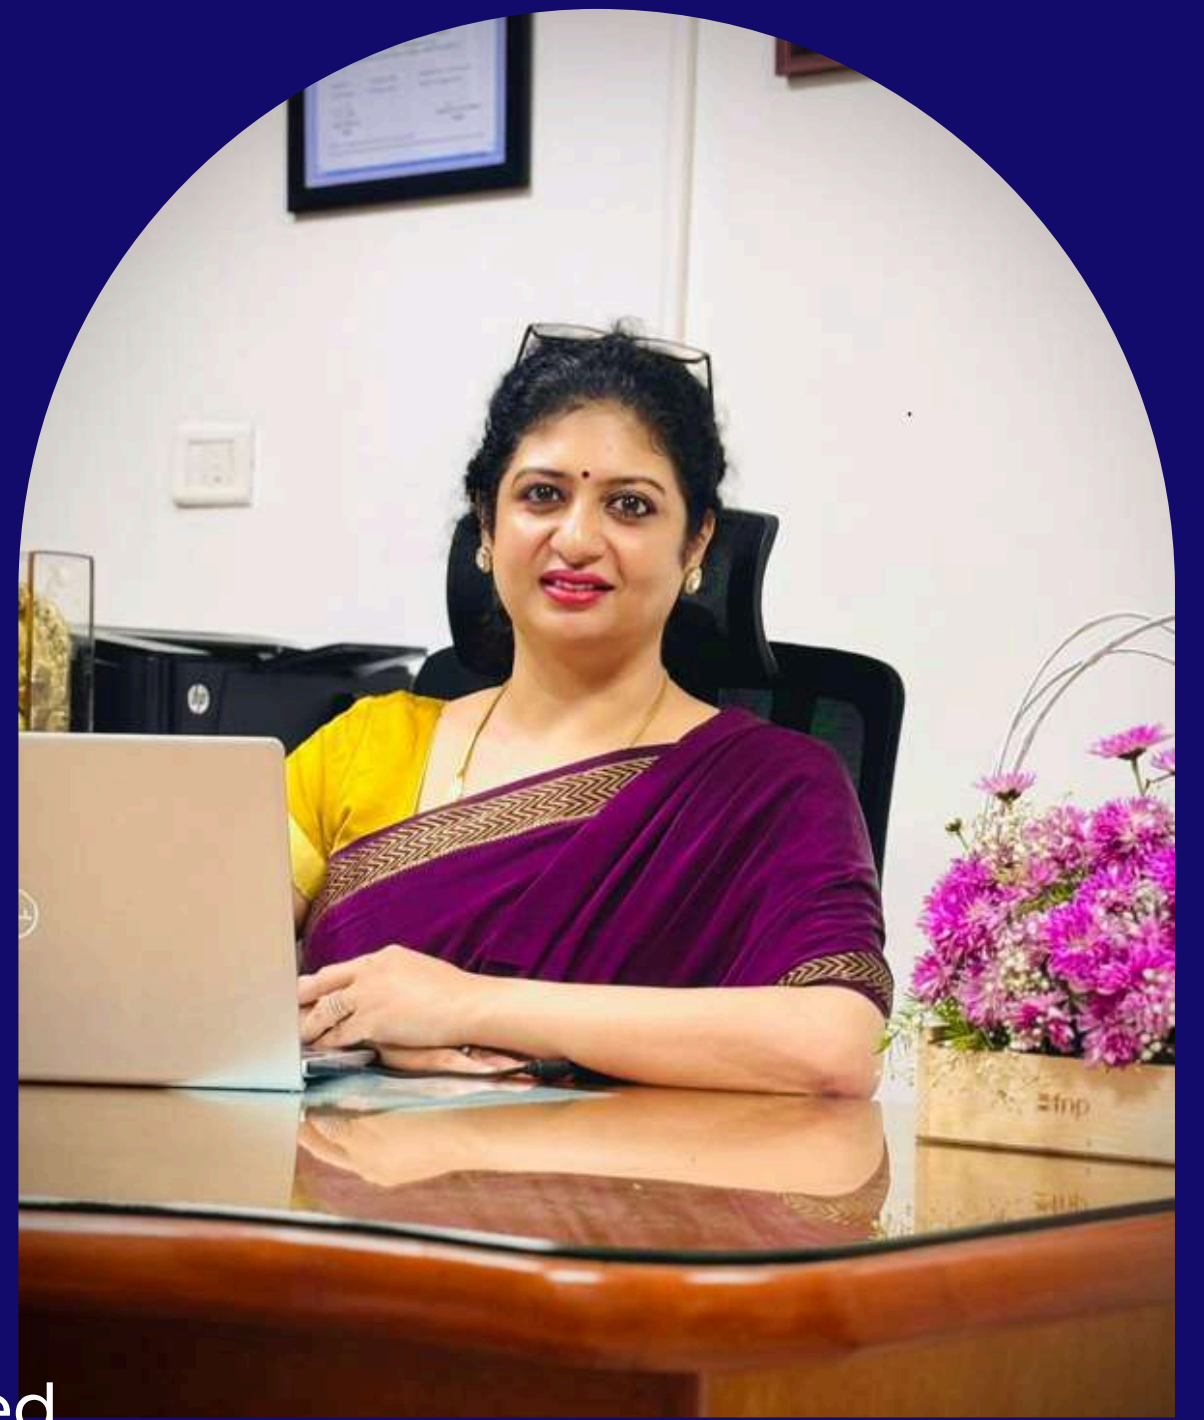

January began with a strong academic focus as students resumed studies with post-mid assessments, while Grade 12 successfully completed their pre-board exams and practical board examinations. Our Grade 9 and 11 students proudly recorded a program on All India Radio (AIR) in celebration of Sankranti, showcasing their creativity and cultural awareness. The festival was also marked with vibrant Sankranti celebrations across the school.

The month also featured a spectacular Jigeesha Sports Day for Grades 3 to 8, where students demonstrated remarkable teamwork and sportsmanship. Adding to the experiential learning, Grades 1 and 2 visited an ice factory, gaining hands-on knowledge, while Grade 6 explored the HAL Museum, delving into aviation history and technology. The month concluded with a patriotic spirit as the school came together for Republic Day celebrations, honoring the values of our nation with performances, speeches, and a flag-hoisting ceremony.

With such an exciting start to the year, we look forward to many more achievements, celebrations, and learning opportunities ahead.

Wishing you all a fantastic 2025 filled with success, growth, and happiness!

**Warm Regards,  
Dr Sita Shankar  
Principal  
Whitefield Global School**

# Editor's Note

**Dear Readers,**

As we flip through another bright chapter of our school journey, I feel a huge sense of pride and happiness presenting this edition of our magazine to you. Season of Wonders: Christmas to New Year's Splendour perfectly captures the celebratory essence of gratitude and hope that epitomizes this particular season.

The holiday season brings with it a magical blend of joy and reflection. Christmas lights remind us of the importance of kindness and giving, and the arrival of a new year brings a ray of hope and possibilities. This magazine is the tapestry of those moments, a reflection of the remarkable achievements, creativity, and resilience of our school community.

In these pages, you will find a glimpse of the festive cheer lighting up our Sankranti celebrations, patriotic fervor that filled our hearts during our Republic Day assembly, and the inquisitive spirits during our Mathematics Day special assembly. Each one of these was a celebration of learning, culture, and collaboration—a reflection of what we are as a community.

From the joyous Graduation Day of our outgoing batch of 2025 to the adventurous excursions for grades 9 & 10 and the vibrant displays of talent on the Annual Day and Sports Day of grades 1 & 2, this year has been a journey of growth and wonder.

Our magazine emphasizes the stories of creativity and discovery in which the students have actively welcomed opportunities for learning, dreaming, and leadership. These writings testify to a wealth of imaginative thought and human potential that finds expression in every corner of our school.

Let the pages remind you of the joy of giving, the strength of unity, and the promise of new beginnings.

Wishing you all a year filled with magic, wonder, and boundless possibilities!

**With the warmest regards,

# Graduation Day-Class of 25'

The Graduation Day celebration of Batch 2025 was a vibrant and emotional event, brimming with pride, joy, and accomplishment. The theme, "Shine Like a Diamond," perfectly reflected the graduates' journey of resilience and the promise of a bright future. The ceremony began with the lighting of the lamp, symbolizing hope and new beginnings. As the academic procession entered alongside the graduates, parents and guests applauded their grace and ambition. Blessings and wisdom from sacred texts such as the Bible, Quran, Guru Granth Sahib, and Bhagavad Gita, along with a soulful choir, celebrated the school's spirit of unity in diversity.

Principal Dr. Sita Shankar inspired the audience with her address, commending the graduates' achievements and encouraging them to embrace the future with confidence. A symbolic handover of leadership from the Head Boy, Mohammad Aabid Maldar and outgoing Head Girl, Niharika Sankranti, to their successors ensured the legacy of excellence continues.

The Chief Guest, Shri Gopal B. Hosur, Retd. Joint Commissioner of Police, shared his wisdom and inspired the students with his distinguished career in law enforcement. The ceremony concluded with a heartfelt toast by student representatives, who expressed gratitude to teachers, parents, and peers.

The evening ended with the graduates stepping forward as shining diamonds, ready to light up the world with their brilliance and aspirations.

# Graduation Day-Class of 25'

# Annual Day-Grades 1 & 2

Whitefield Global School's annual event **Anusmarana** brought the magic of the 90s to life, delighting Grade 1 and 2 students and their families. The event was graced by distinguished guests, including school leaders and directors.

The evening began with a traditional lamp-lighting ceremony, followed by the Annual School Report and the felicitation of winners from Chirasmriti, a parent-child engagement activity.

Students captivated the audience with nostalgic performances inspired by 90s classics like Doordarshan, Vikram-Betal, Malgudi Days, Shaktimaan, The Jungle Book, and Mahabharat, blending entertainment with meaningful lessons.

With laughter, cheers, and heartfelt performances, Anusmarana 2025 was a truly unforgettable celebration of the past.

# To Coorg and Back

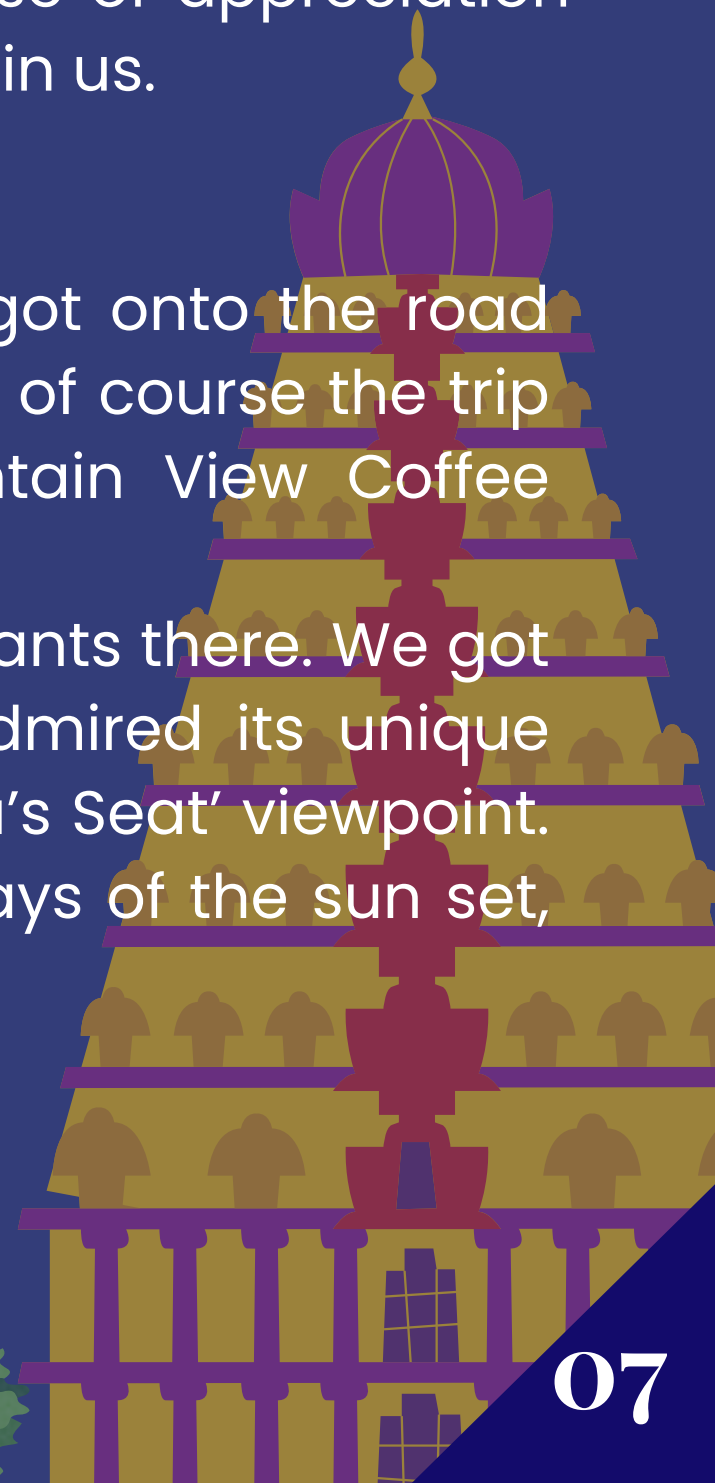

On 21st of December, Grades 9 and 10 had to report to school at 5:30 in the morning! I had barely opened my eyes and processed the fact that I was awake, when I was being herded into a bus alongside 15 other girls from my grade. The sun rays hadn't come out yet, and the fog still occupied the road when we began our journey to the heavenly city of Coorg. As early as it was, the buzz of excitement among us couldn't be hidden. We immediately began singing songs, sharing stories and talking eagerly about the adventures that awaited us.

After a quick stop for breakfast and a few hours of driving we stopped at our first tourist spot! The 'Namdroling Monastery Golden Temple'. This is a working temple where the Tibetan Buddhists pray. There was greenery all around, and the architecture was absolutely spectacular, clearly showcasing their style of building! As soon as we went inside, the atmosphere completely changed! Every wall, pillar and even the ceiling had been painted with scenes. Every art piece told a tale. It was then when we saw the magnificent gold idols, which lay in the centre of the praying hall. It fostered a great sense of appreciation and respect for their culture in us.

After clicking a few photos, and observing these new surroundings, we got onto the road once more. Coorg is famously known for its coffee and tea plantations, so of course the trip would be incomplete without visiting these! We headed to the 'Mountain View Coffee Plantation' where we went on a serene walk through the coffee estate.

The tour guide taught us the names and medicinal properties of several plants there. We got to experience the unparalleled taste of freshly brewed coffee as we admired its unique fragrance. After all the touring, we headed to our last stop of the day, 'Raja's Seat' viewpoint. It was the picture - perfect end to the evening, as we watched the last rays of the sun set, and the sky's shades turn from blue to pink to pitch black.

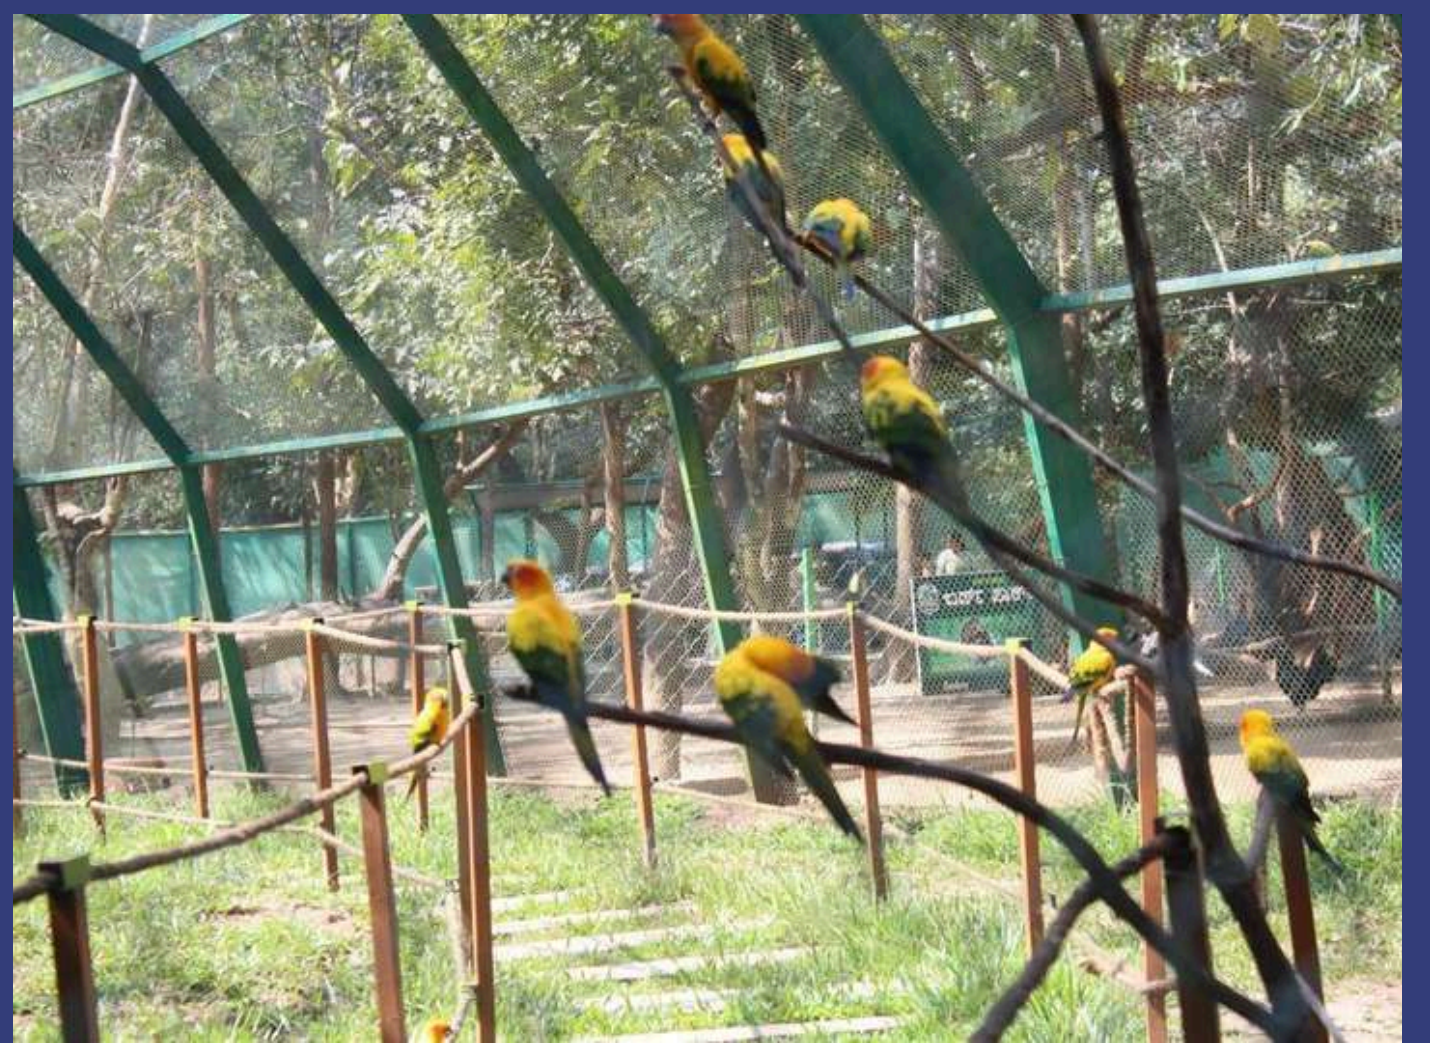

# To Coorg and Back

The next morning, after checking out of our hotels we were entrusted to manage our money and wishes, as we were taken to some local shops. Students could buy souvenirs, gifts, Coorg's prominent chocolate, and coffee for their friends and family. On the bus, we showed off our new pendants, bracelets and relished our ice cream on that hot day. Meanwhile, the bus was enroute to the Kaveri Nisargadhama, a delta formed by the river Kaveri. As we were taken through the forest, I felt as though we had walked into a fairytale!. We walked across a bridge over the scenic delta and into the island's zoo.

We saw chickens, ostriches and even turkeys! Some of my friends even got the high honour of being able to hold birds on their shoulders and hands, while the rest of us clicked pictures on our cameras. The walk back was just as magical, as everyone conversed eagerly about the sights we had seen and fantasies we had witnessed. We returned to school at around 11 in the night.

Perhaps it was only 38 hours but to me our excursion to Coorg was countless dancing, singing, laughing, learning and making memories that we will cherish forever.

# Excursion - Grades 9 & 10

# Excursion - Grades 9 & 10

# Sports Day-Grades 1 & 2

Whitefield Global School's Sports Day for Grades 1 & 2 was a spectacular showcase of energy, enthusiasm, and athletic talent! From fast-paced 50m & 100m sprints to thrilling relay races, our young champions gave their best, cheering for their houses with boundless excitement!

The day concluded with a proud moment as our esteemed Principal Ma'am honored the winners with medals, marking an unforgettable celebration of dedication and teamwork!

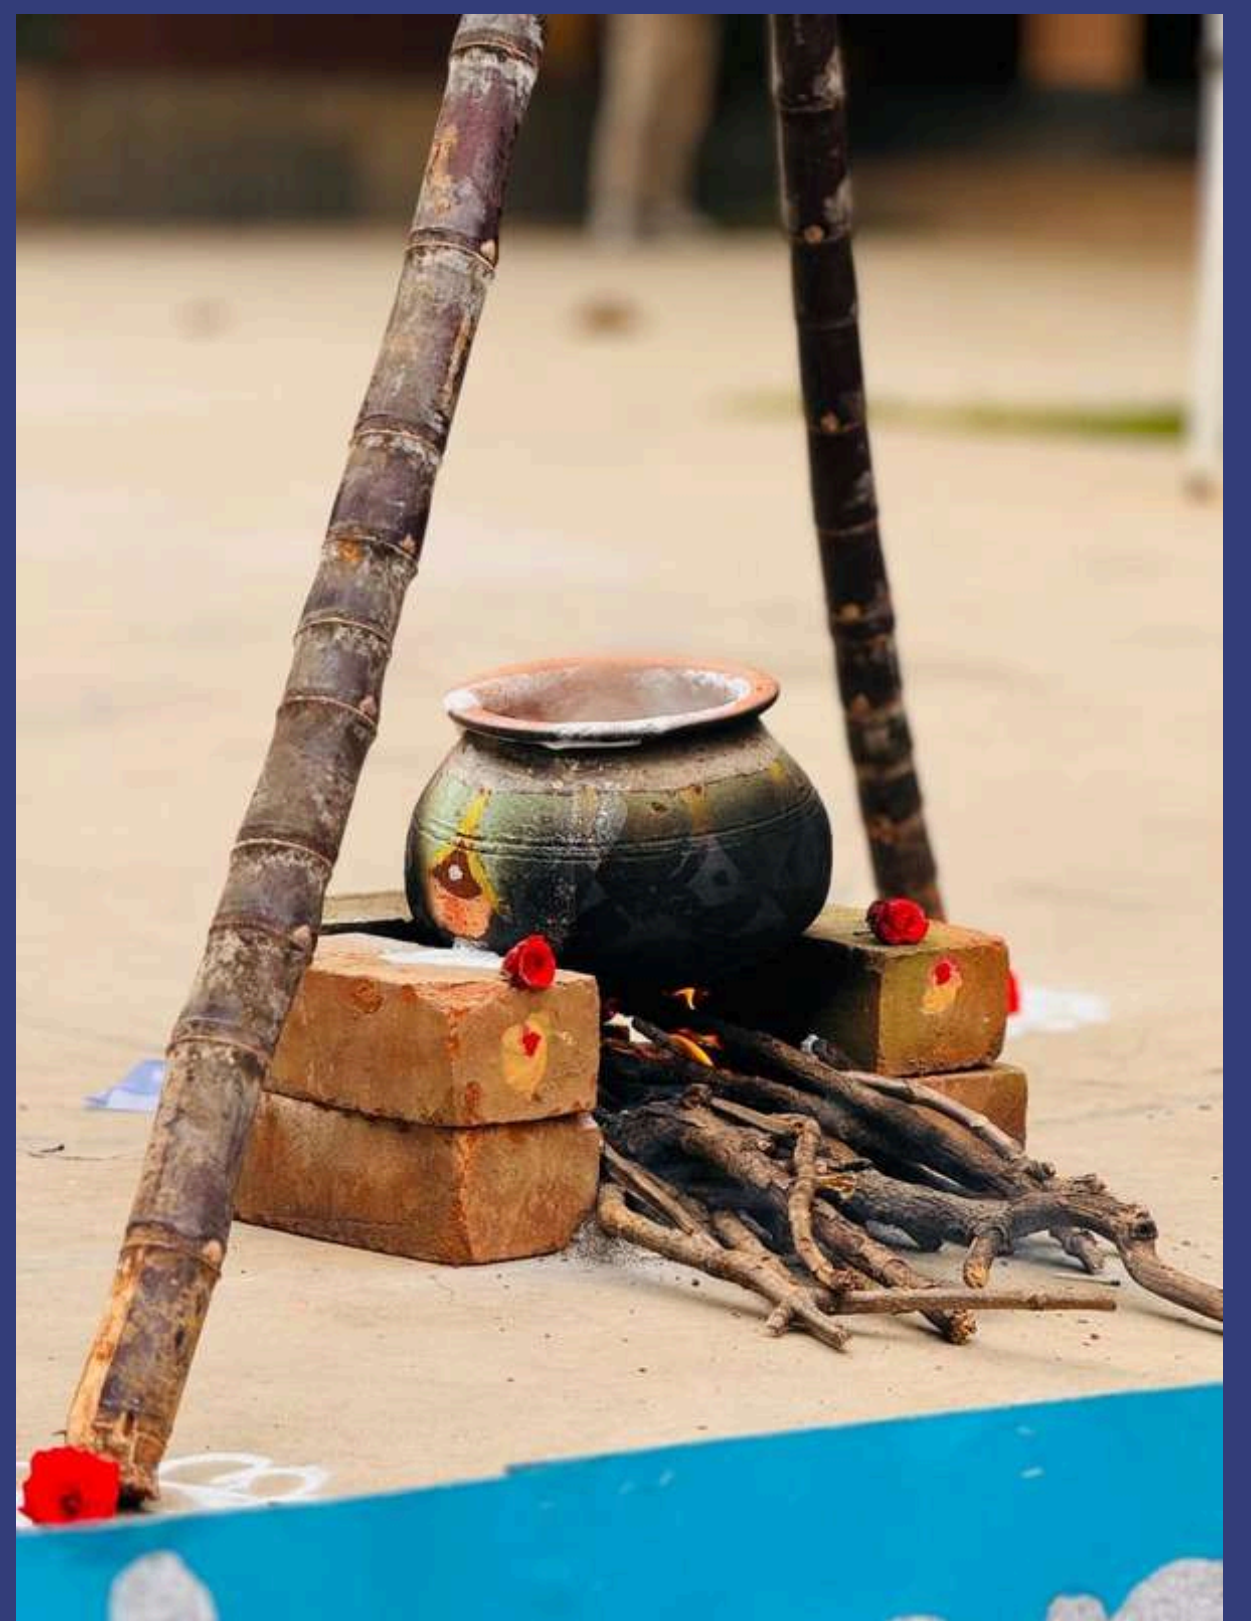

# Makara Sankranti Celebrations

Sankranti, the joyful harvest festival, celebrates gratitude for nature's abundance and the farmers' dedication. Marking the sun's transition into Capricorn, it signifies longer, brighter days and a fresh start. Across India, people rejoice with vibrant kites, traditional sweets, and heartfelt prayers, symbolizing unity, prosperity, and renewal.

Our school honored this cherished festival with special assemblies for the primary students, showcasing its cultural significance through lively performances and activities. The Global Toddlers also participated in a special assembly, adding to the festive spirit and helping even the youngest learners appreciate the essence of Sankranti.

# World Scholars Cup

On the 18th and 19th of January, our school sent eight of its best teams to the prestigious World Scholars Cup event held at Greenwood High International School, Sarjapur. Upon arrival, we received our competition ID cards and headed straight for the auditorium, which was massive and could accommodate 600 people in a single sitting. Soon, they played various songs to refresh our mood after the hour-long travel. The organizers then proceeded with the opening ceremony where they briefed us about the competition. Our first major event was the Team Debate, where two teams debated across various motions. After the debates, we went to the cafeteria for lunch. Shortly after, they asked us to sit in a large hall where they introduced two other events: the Collabowrite and the Scholars Challenge.

In Collabowrite, we were given six prompts and needed to write essays, diary entries, stories, or even poems. The best part about Collabowrite was that we could sit as a team and discuss amongst ourselves. After Collabowrite, we were asked to sit away from our teammates for the next event, the Scholars Challenge. In this event, we had to take a 120-mark test within a single hour, spread over six different subjects. It's safe to say that the Scholars Challenge was indeed challenging. Later, we were provided with hot samosas as part of the evening snacks, and with this, Day 1 came to an end.

In the early hours of the 19th of January, we were asked to report to school at 7:30 AM. As soon as we arrived at Greenwood, we were requested to be seated in their auditorium. Then they unveiled their best-kept secret by calling in Daniel Berdichevsky, the program founder. We were all thrilled to see him as he radiates sheer joy and optimism. Soon, the final and most important event took place in the auditorium, the Scholars Bowl. This event was a multimedia quiz among all the teams, where each team received a clicker to select an answer out of the five options given. One could argue that this event alone could decide the chances of qualification for the global rounds. With the bowl done, the holy ritual of adopting alpacas took place, where we vowed to take care of our newly obtained alpacas and not eat them with other condiments.

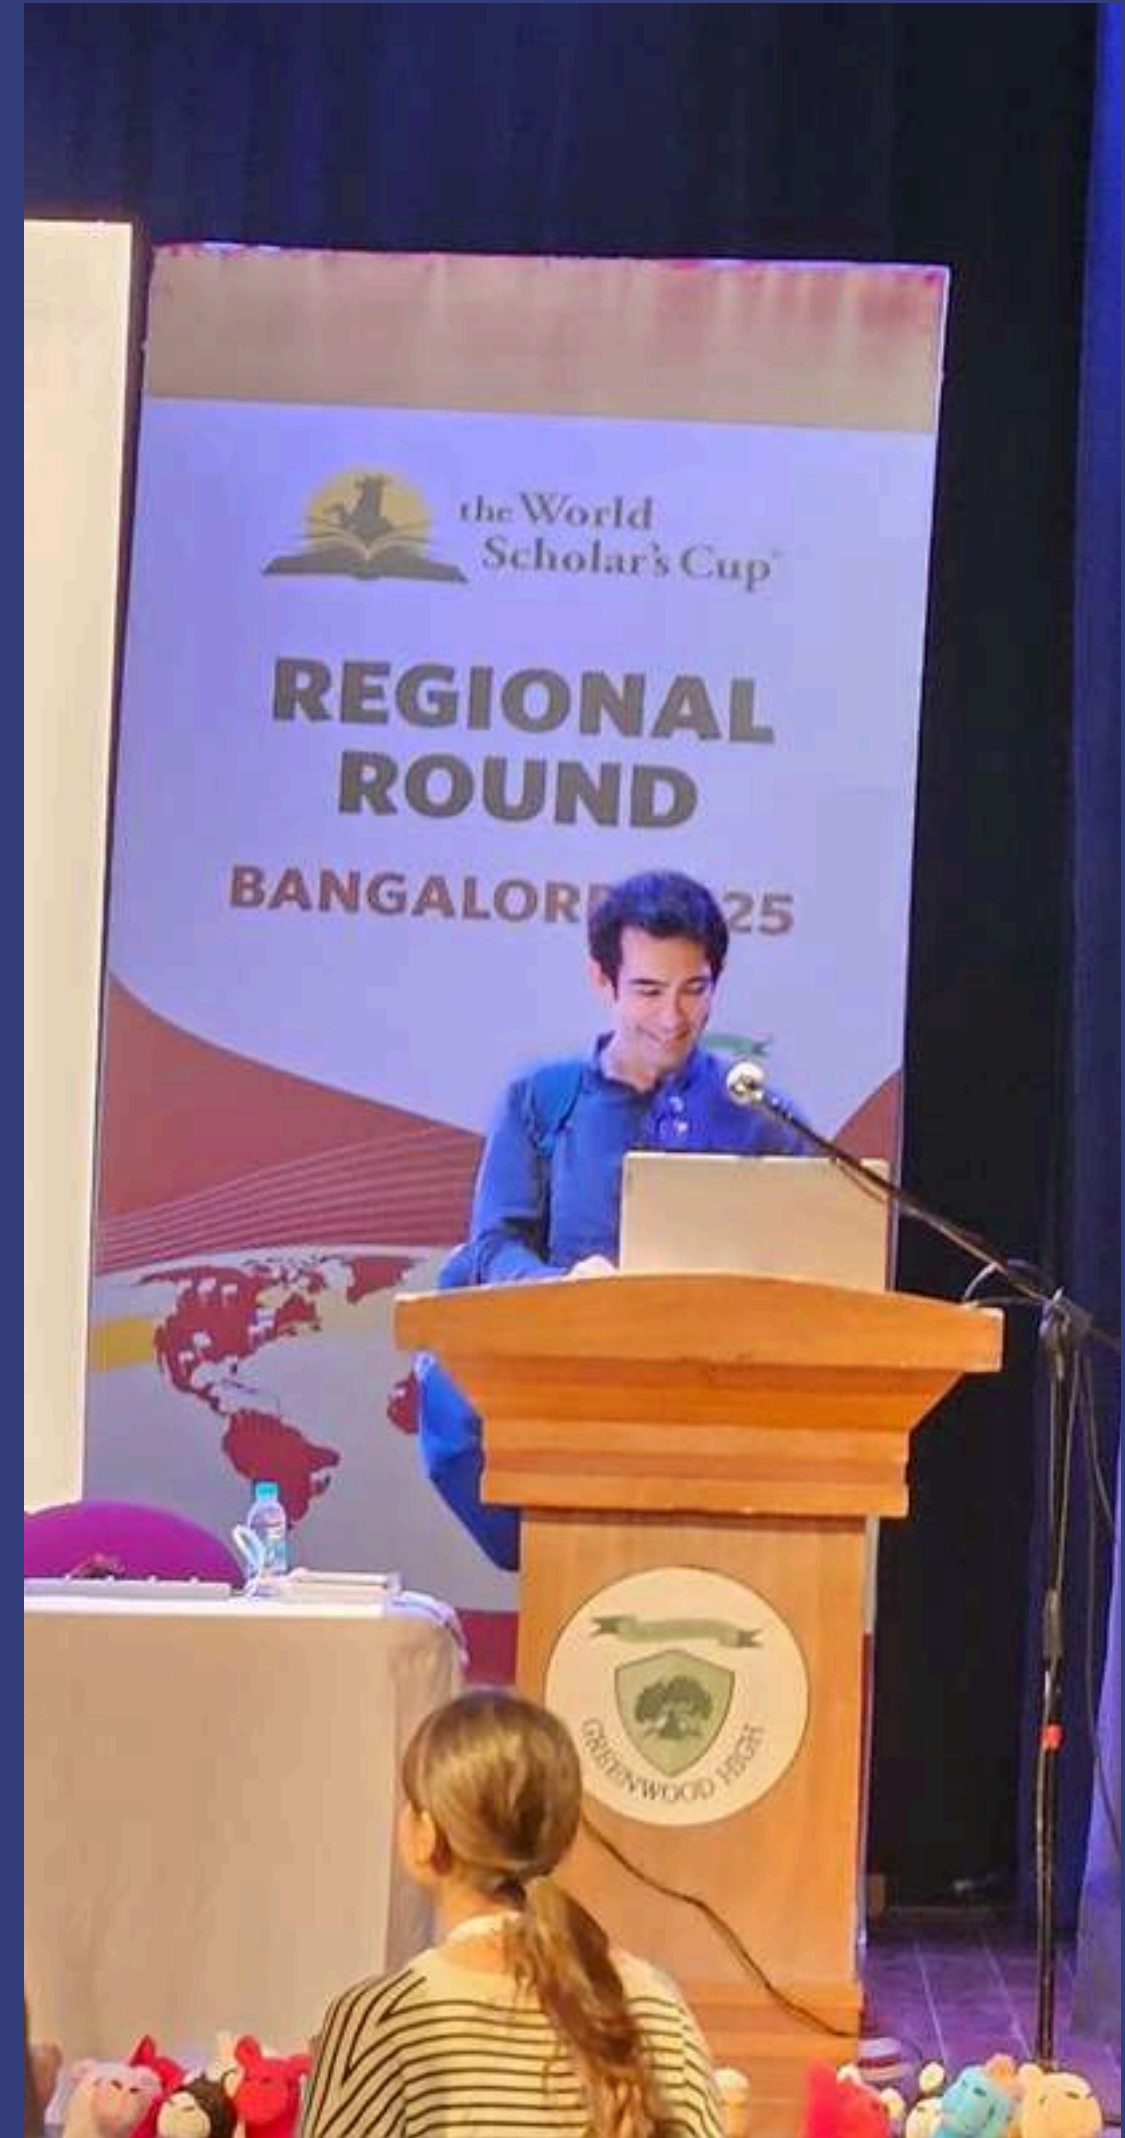

# World Scholars Cup

After the bowl, we had yet another event, the Debate Showcase. In the Debate Showcase, the organizers called upon the top debaters from each school. This was truly fun to watch, as the motion they received was full of flaws, and the way everyone justified each other's points was hilarious! Post the Debate Showcase, we had an entertaining event called the "Scholars Show." In this event, individuals who were talented (or untalented) could unleash their powers by presenting them to fellow scholars. Many clapped, a few laughed out loud, and this concluded the Scholars Show.

The final event that the World Scholars Cup embraces is the closing ceremony. Here, we got to know the outcome of the competition and whether we could continue this magical journey forward with the multiple global rounds they introduced. Surprisingly, our team got #8 overall in the senior division and qualified for the global round. Additionally, all eight teams that we sent qualified. Although this competition lasted for a mere two days, the memories it brought to each of us were quite golden, and it was truly a great experience.

# Mathematics Day

The school celebrated National Mathematics Day to honor the legendary mathematician, Srinivasa Ramanujan. The day was filled with excitement as students engaged in a series of fun and educational activities designed to spark curiosity about the world of numbers.

The celebrations kicked off with an informative assembly where students learned about Ramanujan's remarkable life and his contributions to mathematics. A quiz tested their knowledge, followed by a "Mathematical Puzzle Challenge" that challenged students to solve brain-teasers inspired by Ramanujan's genius. The day also featured a creative writing activity where students expressed their admiration for the mathematician's perseverance and brilliance.

National Mathematics Day serves as a reminder that mathematics is not just a subject, but a way of understanding the world. Through these activities, students were inspired to embrace the beauty of numbers and continue their own mathematical journeys, just like Ramanujan did!

# Republic Day

Whitefield Global School celebrated Republic Day with great enthusiasm and patriotism. The event featured inspiring speeches, cultural performances, and a tribute to the nation's rich heritage. Students showcased their talents through dance, music, and skits, highlighting the values of unity and freedom. The celebration fostered a deep sense of national pride among students and staff.

# CHRISTMAS TO NEW YEAR'S SPLENDOR

# Season of Wonders

The holiday season is a very special time of year! It starts with Christmas and continues all the way to New Year's Day. This magical time is filled with joy, lights, and fun. Let's explore what makes this time so special!

Christmas is celebrated on December 25th. It is a time when many families come together to celebrate. People decorate their homes with colorful lights and put up big, beautiful Christmas trees. Some families hang stockings by the fireplace, hoping that Santa Claus will fill them with candy and toys! On Christmas Day, families often gather to eat delicious food, like turkey, ham, or cookies. Many people exchange gifts, showing love and kindness to each other. The best part about Christmas is spending time with family and friends, making happy memories together.

New Year's Eve is on December 31st, the last day of the year. It is exciting because many people celebrate and count down the last few seconds of the year! Families might have parties, watch fireworks, and share special drinks like sparkling juice. At midnight, when the clock strikes twelve, everyone cheers and wishes each other a Happy New Year! Some people like to make "New Year's resolutions," which are promises to try to do better things in the new year, like being kind, eating healthy, or learning something new.

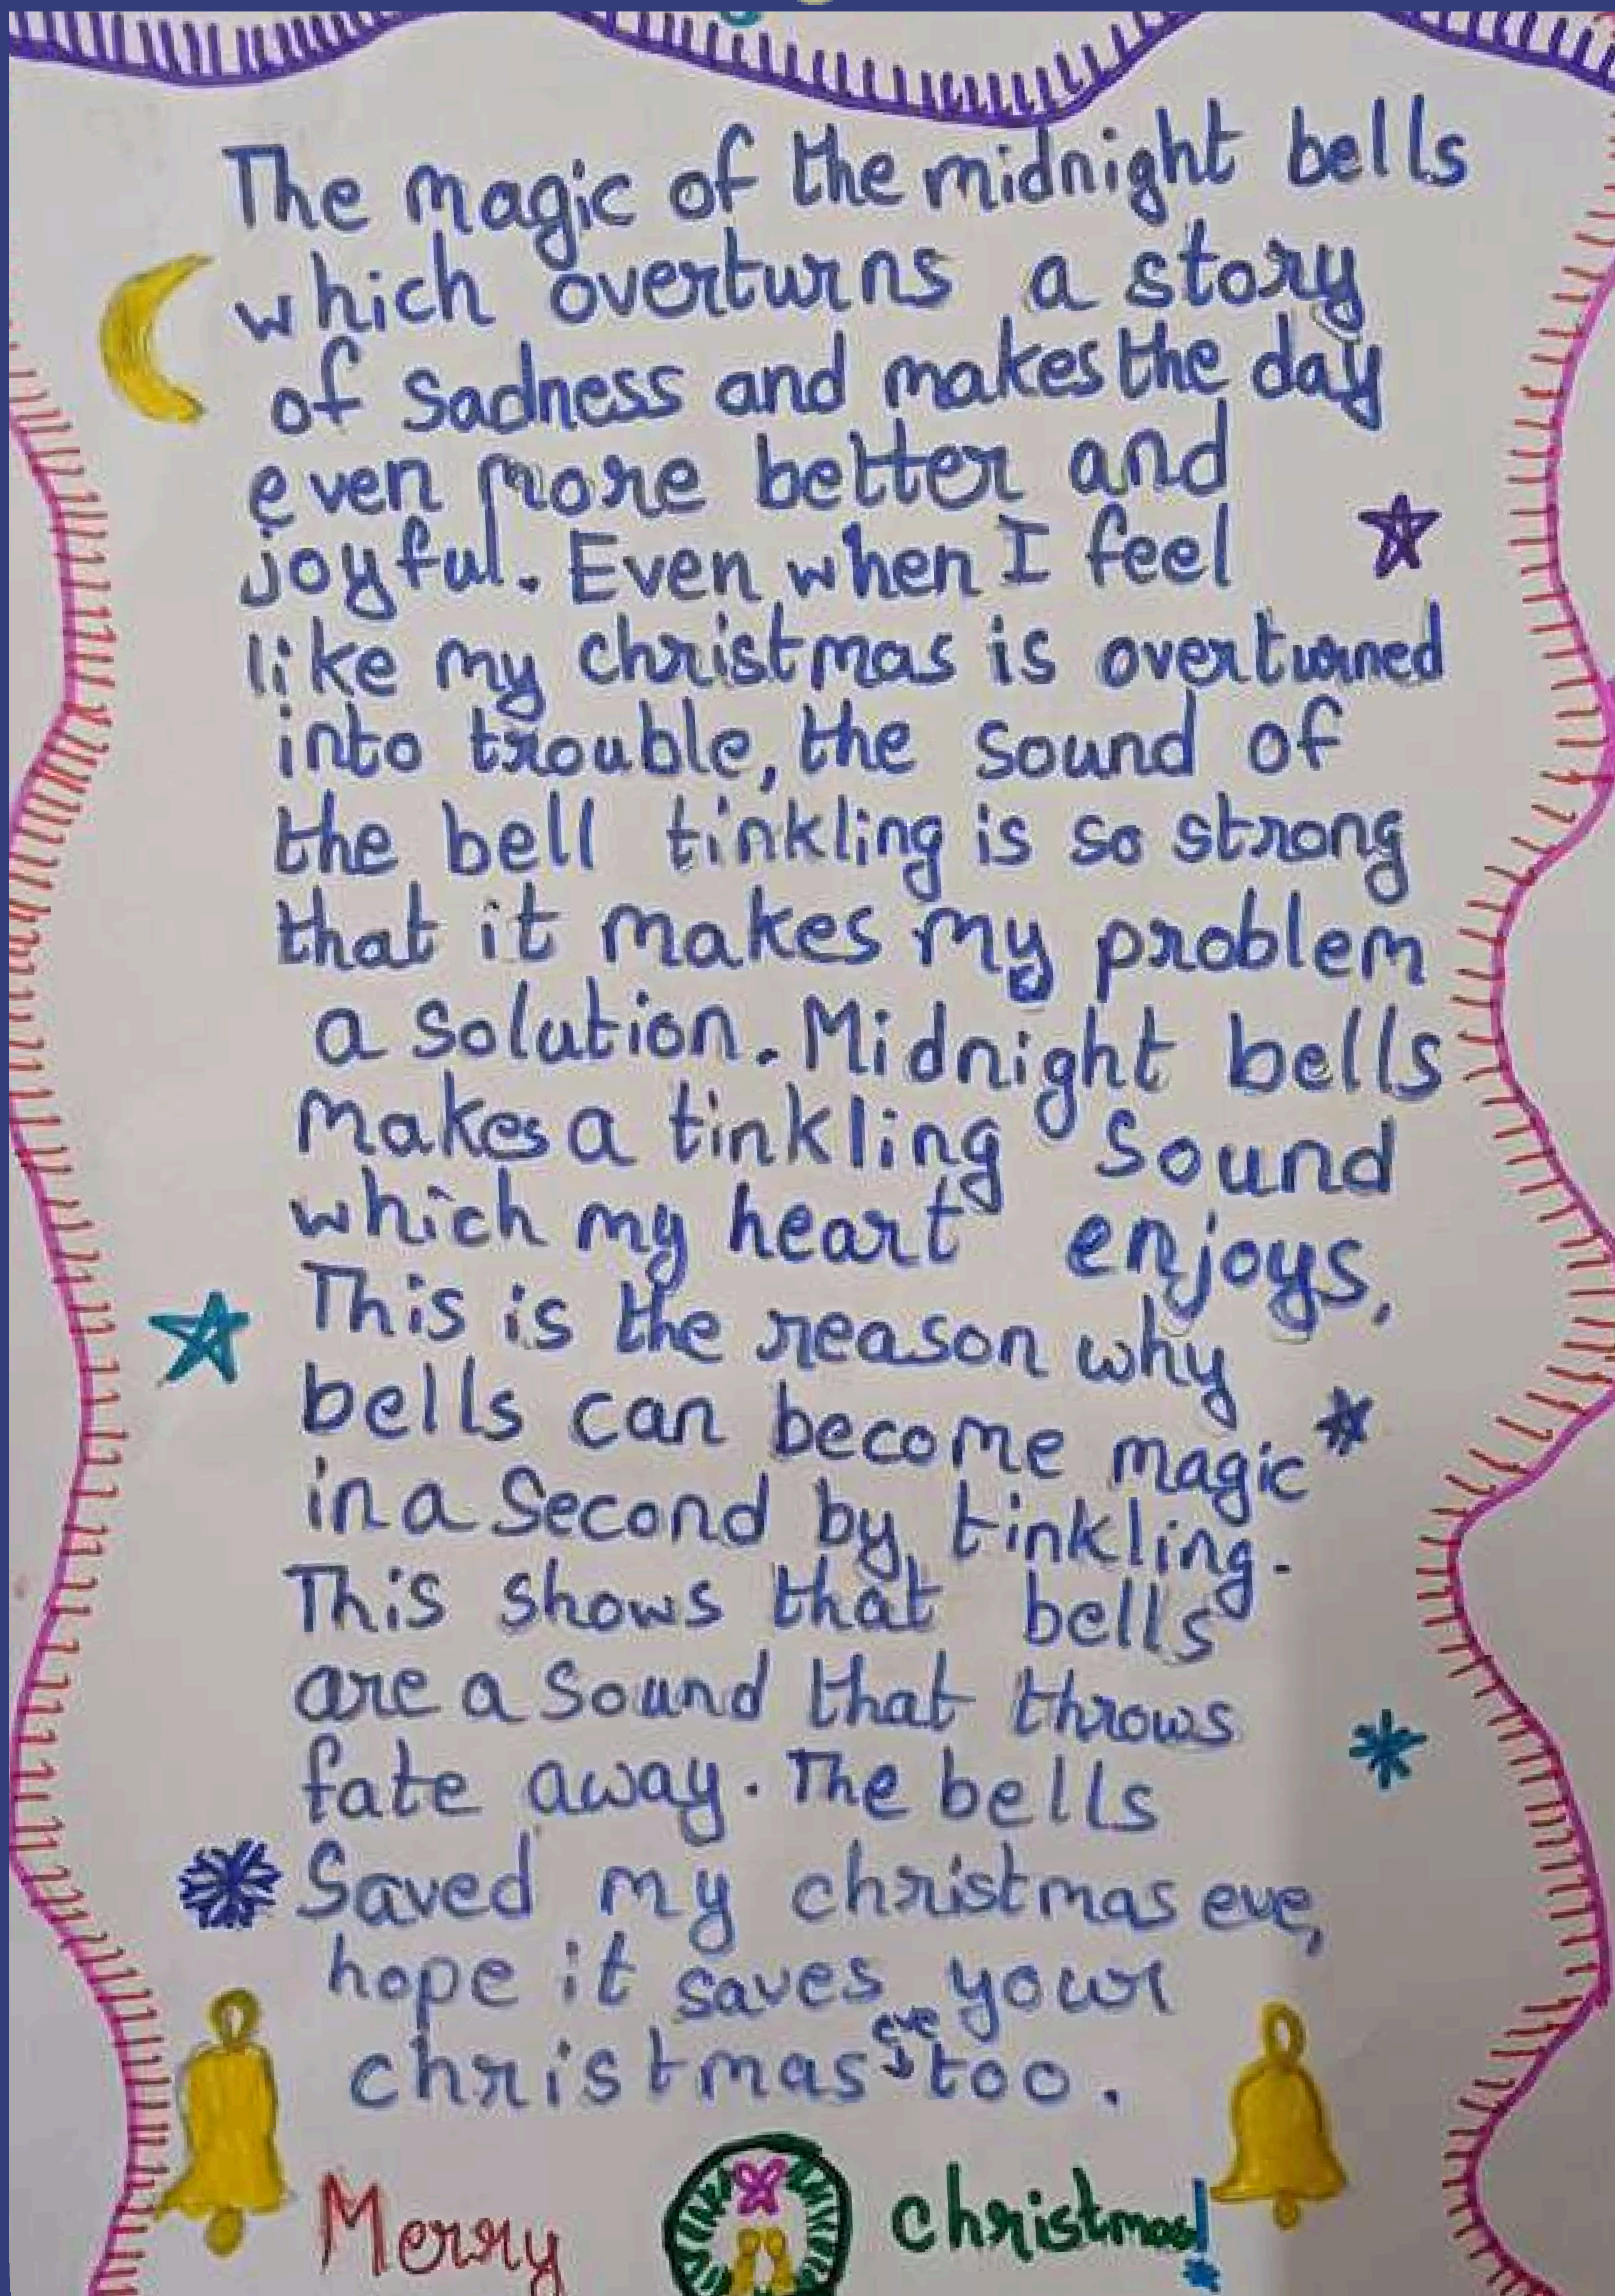

Finally, comes New Year's Day on January 1st. This day is a fresh start, just like a blank page in a book. Many people wear bright, festive clothes and enjoy yummy food such as pancakes or a big lunch with their families. It is a day filled with hope and excitement for the year ahead.

The time between Christmas and New Year's is full of magic, joy, and new beginnings. It's a time to celebrate, be with loved ones, and reflect on everything we are thankful for. So, this holiday season, let's enjoy the splendor together and look forward to all the exciting adventures that the new year will bring!

# The Christmas Adventure

It's Christmas night. John decorated his Christmas tree and hung a sock waiting for Santa's gift. He went to sleep in excitement. After Sometime, he heard a noise. He went to his living room and there he saw lots of gifts near to the Christmas tree. He was curious to know what was inside the gifts. He started opening them quietly.

He saw letters A-Z inside one of the gifts. Suddenly, letters of Christmas C, H, R, I, S, T, M, A and S, ran away through the window. They wanted to explore the Christmas outside. John was surprised by what he saw. He didn't know what to do !!! He decided to find the CHRISTMAS letters. So he packed his bag and set off for his adventurous journey.

He first came to a village where he saw kids playing in the snow. They were playing with snowballs and making snow men. Inside one of the snowmen, he saw letters C, H and R hiding. He kept them inside his bag. Next he came to a CANDY HOUSE, where he saw lots of candies that was as big as a snowman. Inside the candy house he saw letters I, S and T eating candies. He picked up the letters and kept them inside his bag along with other letters.

He was tired after wandering for a long time. So he decided to take some rest. Suddenly he heard someone calling for help. He saw a monster sitting near a snow mountain with the remaining letters M, A and S, crying for help. John quietly went near the monster and tickled him and all the letters slipped from his hand. He quietly took all the letters and ran from there.

John finally reached home looking very tired, but he was very happy that he finally got all the letters back. He quietly kept them back in the gift box and went back to sleep. He thanked Santa for such an adventurous day making his CHRISTMAS SPECIAL.

# HOLIDAY READS

# The Power of Pages

With each page that turns a new world appears,  
A story of wonder with hopes and fears.  
Each word lifts us, makes us dream,  
Opening doors to what life can mean.

The ink on the page like a quiet guide,  
Shapes who we are, standing side by side.  
It sparks new ideas, helps us grow,  
And leads to places we never did know.

Through pages we travel, far and wide,  
Changing our views with each twist and stride.  
The words ignite our vision we hold so tight,  
Filling our hearts with hope and light.

Every chapter we read, every line we trace,  
Becomes a journey, a change we embrace.  
For in the pages, we find our way,  
To brighter futures, day by day.

# Through the Student Lens: Insights, Inspiration, and Innovation

## **2024 US ELECTIONS: DONALD TRUMP'S UNYIELDING RESILIENCE**

Donald Trump has showcased a remarkable level of resilience throughout the 2024 U.S. elections, overcoming obstacles that would have side-lined many. Despite ongoing legal challenges, Trump has turned them into a central part of his narrative, positioning himself as a victim of political persecution which has significantly solidified his base. Trump's resilience is evident in his ability to adapt to shifting political dynamics, including strong competition from his own party. He has remained a dominant force by addressing the concerns of voters who feel left behind by traditional politics. Trump's capacity to navigate challenges such as a struggling economy, inflation, and global tensions while staying true to his core beliefs highlights his unwavering determination. His resilience is most apparent in his ability to stage comebacks. His tenacity in the face of adversity and his ability to persist despite numerous setbacks underscore his lasting political influence and proving his perseverant nature.

# Through the Student Lens: Insights, Inspiration, and Innovation

## THE SCIENCE & THEORIES OF TIME TRAVEL

### 1. CONCEPT OF TIME TRAVEL:

Time travel is the movement from one point in time to another, usually by a “time machine.”

There are mainly two types of time travel—forward time travel, which involves moving into the future, and backward time travel, which means going back into the past.

### 2. THEORIES OF TIME TRAVEL:

#### Einstein’s Theory of Relativity and Time Dilation:

Time is relative and changes with speed and gravity. This revolves around Einstein’s concept of time dilation, which basically means the slowing down of time. For example, if you are sitting next to your crush and talking to him or her for two hours, it feels as if only two minutes have passed. But if you sit on a hot frying pan for even two seconds, it feels as if it has been two hours since you sat on the pan. Before Einstein, time was considered constant. Yet, with his theory, time can actually change with speed and gravity. Considering speed, if the speed is greater, time would pass slower. Time is relative, and it slows down in relation to us.

So, theoretically speaking, if we build a spaceship that can travel at the speed of light, you can travel to the future. You first travel in space for a couple of years, and when you come back, a long time would have passed on Earth. If you travel in space for ten years, then 9,000 years would have passed on Earth!

These are a few scientific concepts that help in the Time Travel Theory:

- **General Relativity:** Allows time travel, such as by means of wormholes, which are hypothetical passages through space-time, and time dilation.
- **Quantum Mechanics:** Certain interpretations (e.g., many-worlds theory) do permit time travel in a quantum setting.

### 3. MAJOR OBSTACLES:

#### Establishing or maintaining stable wormholes:

This generally avoids paradoxes like the “grandfather paradox,” where a means to travel back in time would create logical contradictions by changing past events.

### 4. PRACTICAL ISSUES:

- **Energy Requirements:** The amount of energy needed for time travel is immense, especially for making and keeping a stable wormhole.
- **Speed of Light Limitation:** Time travel is also possible if we travel at the speed of light ( $3 \times 10^8$  m/s) or faster. BUT this is practically not possible. First of all, making a spaceship that can travel at the speed of light is currently not possible, as any spaceship would be destroyed if it tried to travel at such a speed. Let’s say that we made such a spaceship, but when a person is traveling in it at such a high speed, his body wouldn’t survive. Even his other organs would be damaged, and he would die, making it pointless for him to travel in that spaceship.
- **Causality Problems:** Traveling back in time would violate the principle of causality and possibly bring about paradoxes and interference in the flow of time, like the famous Grandfather Paradox. Let’s say we traveled back in time and killed our grandfather when he was young. This would mean that he would have never married, so he wouldn’t have had a son or any grandchildren. So, how were you born?

### 5. CONCLUSION:

To conclude, time travel is still purely theoretical, with no experimental evidence that it is feasible.

On paper, it seems that time travel is possible, as many theories suggest it, but with so many practical issues, it feels impossible.

Physics is still exploring this field, and future research may ultimately determine whether time travel is possible.

**GRATITUDE JOURNAL**

I am grateful for my parents, my grandparents and to mature for such lovely and humble parents, my grandparents and my maternal uncle & aunt. My parents spend lots of time with me whether it's playing with me or answering my queries which I am curious to hear about and know more about it. I spend few days at my grandparents place, we went to go for our very first GoKart game. This was my first time behind the wheels and was terrified. My mother's cheerleading encouraged me to go for it and enjoyed the time being there. My mother said "It's okay to be scared, but trying it is good".

I am incredibly grateful for the people in my life who make every day brighter - my close friends, and those who have been there through thick and thin. My best ones are my foundation, and their love, guidance, and support have shaped me into who I am today. Every Christmas we come together to celebrate the season of giving and gratitude. We start by decorating the house, filling it with twinkling lights, and putting up a Christmas tree, which always becomes a focal point of joy. On Christmas Eve, we gather for a big family dinner, sharing favorite dishes that have been passed down through generations. There's always laughter, storytelling, and a sense of deep connection. Christmas Day is filled with the excitement of exchanging carefully chosen gifts, each one symbolizing a moment of thoughtfulness. I truly feel the warmth of love and the true spirit of Christmas.
